36 Best-practice interventions: Suppressing the scourge of AMI

By Sarah Ann Lackey, RN, MSN

Learn about seven lifesaving steps in the fifth article in our series based on the Institute for Healthcare Improvement's campaign to prevent 100,000 avoidable deaths.

54 Nursing2006 Patient-safety survey report

By Martin Manno, APRN, BC, MSN; Patricia Hogan, RN, MSN; Valerie Heberlein, RN; Josephine Nyakiti, RN; and Cheryl L. Mee, RN, BC, CMSRN, MSN

How safe are your patients from drug errors, falls, and other adverse events? Find out what your colleagues have to say in a major national survey on this important issue.

Treatment guidelines for AMI, page 36

Assessing inner ear disease, page 48

33 Clinical rounds: News, updates, research

Bringing hospital-caliber care to the home improves outcomes, saves money... persuading retired nurses to return to the bedside... chewing gum after surgery speeds recovery... and more.

43 Patient-education guide: Heart attack

By Karen Jean Craig, RN, EMT-P, BS

Teach your patient to recognize signs and symptoms of myocardial infarction, then give her this handout to take home.

44 **NURSES WEEK TRIBUTE** Recalling a legacy of service

By Lois Gerber, RN, MPH, MSN

Nursing was in my mother's blood—and it's in mine, too.

46 **PHOTO GUIDE** Your patient's receiving noninvasive positive-pressure ventilation

By Susan R. Gavaghan, APRN, BC, CCRN, MSN, and Marian Jeffries, APRN, BC, FNP-C, MSN

By using this noninvasive technology to improve gas exchange, you can eliminate the risks of endotracheal intubation.

48 Spin control: Caring for a patient with inner ear disease

By Richard L. Pullen, Jr., RN, EdD

Find out how to help a patient plagued by debilitating vertigo or hearing loss.

52 Understanding the new AHA guidelines, part II

By Karen Jean Craig, RN, EMT-P, BS, and Loraine Hopkins-Pepe, RN, MSN

Make sure your advanced cardiac life support skills are current by reviewing this summary of the latest recommendations.

80 **ACTION STAT** Black widow spider bite

By Susan Simmons Holcomb, APRN, BC, PhD

Intervene promptly to prevent serious neurologic complications.
