Original Research: Hospital System Barriers to Rapid Response Team Activation: A Cognitive Work Analysis

By Jane Saucedo Braaten

The author uses a framework of cognitive work analysis to examine factors affecting nurses’ decision making when activating rapid response teams in emergency situations.

Long-Term Outcomes After Repair of Congenital Heart Defects: Part 2

By Marion E. McRae

This second part of a two-part article reviews four congenital heart defects, their repairs, and their common long-term outcomes, along with implications for nurses in both cardiac and noncardiac settings.

Advancing Health Through Nursing, Progress of the Campaign for Action: A Bold New Vision for America’s Health Care System

By Susan B. Hassmiller and Susan C. Reinhard

This article introduces a new series examining the impact of the Institute of Medicine’s 2010 report, The Future of Nursing: Leading Change, Advancing Health, at five years. This first installment reviews the barriers to implementing the report’s recommendations, the progress made, and the work that lies ahead.

By Deborah Greenwood

In this case study, a patient successfully uses self-monitoring techniques and clinician telehealth support to help with the challenge of managing diabetes.

Reflections: ’Swabbing Tubby’

By Susan Clements

Family caregiving can be trying on many levels, but a little levity may help.
Mission Statement: The leading voice for the nursing profession since 1900, AJN promotes excellence in nursing and health care through the dissemination of evidence-based, peer-reviewed clinical information and original research, discussion of relevant and controversial professional issues, adherence to standards of journalistic integrity and excellence, and promotion of nursing perspectives to the health care community and the public.
