Health Care Workers and Burnout: A Cross-Sectional Study

By Carol Vidal, Andrea Stennett, Philip Leaf, Nihaal Rahman, Leticia Ryan, and Nathan Irvin

This study explores associations between workers' attitudes toward trauma-informed care, worries about workplace violence, and burnout through a survey administered as part of a public health initiative.

30 Clinical Feature

Auto-Brewery Syndrome: Diagnosis and Treatment of This Little-Known Condition

NCPD **OPEN**

By Barbara Cordell

An overview of auto-brewery syndrome includes its presentation, diagnosis, treatment, and follow-up and the nursing implications for the care of these vulnerable patients.

38 Original Research

Perceived Stress, Residential Indoor PM_{2.5} Concentration, and Motor Vehicle Traffic Exposure Among Adults with Asthma: A Secondary Analysis

By Grant Colvin, Barbara J. Polivka, Emily Cramer, Sharmilee Nyenhuis, Luz Huntington-Moskos, Kathryn Krueger, Olivia Bimbi, and Kamal Eldeirawi

The authors investigate associations between self-reported motor vehicle traffic exposure, indoor concentrations of fine particulate matter, and levels of perceived stress among U.S. adults living with poorly controlled asthma.

46 Nursing Research, Step by Step

Reporting Guidelines: An Overview

By Sameh Eltaybani

The author describes reporting guidelines relevant to nursing research; explains how these guidelines are developed and why they are important; introduces the EQUATOR Network, a searchable database of reporting guidelines; and advises on the appropriate use of such guidelines.

50 Quality Improvement

Optimizing Nurses' Time: Reducing Assessment Frequency in General Care

By Stephanie P. Chambers, Stephanie M. Slack, Marny L. Carlson, Kristina J. Masching, and Michael A. Rysavy

This quality improvement project examined whether decreasing comprehensive physical assessments from twice daily to once daily affected patient safety or care quality, and also assessed staff satisfaction with the practice change.
