## EDITORIAL

### FROM THE EDITOR

- 321 The Peer Review Process: Some Gentle Reminders for Us All**  
*Barbara Resnick*

screening program. This study points out the critical need for a more comprehensive and personalized bone health program that includes more than classroom-based education.

## FEATURE ARTICLES

- 324 Effectiveness of Transcutaneous Electrical Acupoint Stimulation for Improving Depressive Mood Status among Nursing Home Elders in Taiwan: A Pilot Study**  
*Su-Hsien Chang, Miao-Chun Fang, and Ya-Shu Yang*

Transcutaneous Electrical Acupoint Stimulation can be a safe, easy, and non-invasive, technique for nursing home staff to improve the depressive mood status of elders.

- 331 Current Evidence Regarding Models of Acute Care for Hospitalized Geriatric Patients**  
*Julia S. Steele*

This paper examines three models of acute care for hospitalized older adults: Acute Care for Elders (ACE), Hospitalized Elder Life Program (HELP), and Nurses Improving Care for Health-System Elders (NICHE).

- 348 The Effect of the Addition of Osteoporosis Education to a Bone Health Screening Program for Older Adults**

*Jean M. Gaines, Matthew Narrett, and John M. Parrish*

The purpose of this longitudinal study was to investigate the value of adding initial and refresher osteoporosis education classes to a bone health
