

GERIATRIC NURSING

VOL. 38, NO. 1 □ JANUARY/FEBRUARY 2017

EDITORIAL

FROM THE EDITOR

- 7 Patient centered care:
We are definitely not
there yet!**

Barbara Resnick

FEATURE ARTICLES

- 9 Caregivers for older adults:
Prevalence, characteristics,
and health care utilization and
expenditures**

Shirley Musich, Shaohung S. Wang,
Sandra Kraemer, Kevin Hawkins, and
Ellen Wicker

These results indicated an adverse impact on psychological health associated with caregiving but no evidence of a negative impact on physical health.

- 17 Observations of oral hygiene care
interventions provided by nurses to
hospitalized older people**

Esther Coker, Jenny Ploeg,
Sharon Kaasalainen, and Nancy Carter

Nurses provided supporting the care of persons with dentures, supporting the care of natural teeth, cleansing the tongue and oral cavity, and moisturizing lips and oral tissues.

- 22 The role of interpersonal sensitivity,
social support, and quality of life in
rural older adults**

Monika Wedgeworth, Michael A. LaRocca,
William F. Chaplin, and Forrest Scogin

Hierarchical regression revealed that interpersonal sensitivity and social support satisfaction predicted quality of life.

- 27 Older adults' personal routine at time
of hospitalization**

Anna Zisberg and Nurit Gur-Yaish

Given the importance of routine maintenance to health and well-being, understanding the dynamics of its disruption in the hospital setting is imperative.

- 33 Are nursing home care workers' health
and presenteeism associated
with implicit rationing of
care? A cross-sectional
multi-site study**

Suzanne R. Dhaini, Franziska Zúñiga,
Dietmar Ausserhofer, Michael Simon,
Regina Kunz, Sabina De Geest, and
Rene Schwendimann

Care workers health complaints are strongly associated with rationing of tasks directly related to resident care.

- 39 Long-term effectiveness and
safety of once-daily, single-entity,
extended-release hydrocodone
in patients of ≥ 75 years of age
with moderate to severe
nonmalignant and
nonneuropathic pain**

Kathleen Broglio, Joseph Pergolizzi,
Maribeth Kowalski, Shau Yu Lynch, Ellie He,
and Warren Wen

Hysingla[®] ER provided clinically meaningful reduction of pain scores in elderly patients that were maintained over a 52-week period.

GERIATRIC NURSING

VOL. 38, NO. 1 □ JANUARY/FEBRUARY 2017

48 Meaning in stroke family caregiving: A literature review

Jingjun Zhang and Diana T.F. Lee

Meaning plays an important role in stroke family caregiving. Understanding meaning facilitates the development of effective interventions that support stroke family caregivers.

57 Caregiving setting and Baby Boomer caregiver stress processes: Findings from the National Study of Caregiving (NSOC)

Heehyul Moon, Sunshine Rote, and Jeff A. Beaty

The degree of informal support was consequential for the health of caregivers providing care to older adults in the community.

63 Personality of the caregiver influences the use of strategies to deal with the behavior of persons with dementia

Graça Melo, João Maroco, Marta Lima-Basto, and Alexandre de Mendonça

Personality of family caregiver is an important factor influencing the caregiver's burden, depression and distress. Caregiver's personality should be taken into account when designing adapted intervention programs.
