Features

**34** Targeting therapy with central venous access devices
By Lynn C. Hadaway, RN,C, CRNI, MEd
Take aim at assessing and managing these common devices to ensure successful therapy and protect your patient from dangerous complications.

**42** Nursing2008 Pain management survey report
By Yvonne D'Arcy, CRNP, CNS, MS
Find out how nearly 3,000 nurses across the nation responded to our survey, then use this information to sharpen your own pain management skills.

For immediate CE test processing, see our Web site at [http://www.nursingcenter.com/ce/nursing](http://www.nursingcenter.com/ce/nursing).

**25** Clinical rounds: News, updates, research
Baby boomers heading for the door...AHA approves hands-only CPR for bystanders...unique error detection tool uncovers more pediatric adverse events...and more.

**28** Fever and hyperthermia: Learn to beat the heat
By Robin M. Beard, RN, PCCN, MS, and Michael W. Day, RN, CCRN, MSN
Is it a fever or hyperthermia? Learn to differentiate the two so you can act quickly and appropriately to cool off the crisis.

**33** PATIENT EDUCATION SERIES MRSA infections
By Susan Simmons Holcomb, ARNP, BC, PhD
Teach your patient what she needs to know about community-associated MRSA infection, then give her this handout to take home.

**52** Caring for a patient with metastatic prostate cancer
By Jeanne Held-Warmkessel, RN, AOCN, APRN, BC, MSN
A patient with metastatic prostate cancer has many treatment options. Here's what to teach him and how to support him throughout therapy.

**72** ACTION STAT Fracture in the field
By Michael W. Day, RN, CCRN, MSN
Take quick action to assess and support someone who's just fractured a bone.
