Feature

CANCER TREATMENT

43 Lung Cancer Diagnosis in Primary Care

Brooke M. Simon, RN, BSN, MSN

CE Lung cancer is currently the most fatal malignancy in the world. More individuals die from lung cancer than breast, colorectal, and prostate cancers combined. Nurse practitioners should be knowledgeable about risk factors, pathophysiology, and presenting symptoms. Familiarity with current evidence-based research regarding the roles of genetics and estrogen in the development of this disease is essential to ensure timely and appropriate decisions regarding follow-up and management.

Manuscripts

The Nurse Practitioner is a refereed journal and articles are accepted on a nonremunerative basis. Submitted manuscripts must contain original material and are reviewed with the explicit understanding that their essential substance or contents have not been or will not be submitted for publication elsewhere. Lippincott Williams & Wilkins no responsibility for the statements and opinions advanced by contributors. *The Nurse Practitioner: The American Journal of Primary Healthcare* is registered in the U.S. Patent Office, 1975. The names and contents are copyrighted. © 2007 Lippincott Williams & Wilkins. No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. No suggested test or procedure should be carried out unless, in the reader's judgment, its risk is justified. Because of rapid advances in the medical sciences, we recommend that the independent verification of diagnoses and drug dosages should be made. Discussions, views, and recommendations as to medical procedures, choice of drugs, and drug dosages are the responsibility of the authors.

Reprint Information

Quotes of up to 500 words from any issue are permitted, for noncommercial purposes, with credit to *The Nurse Practitioner*, except for articles bearing a copyright notice of others. Authorization to photocopy (reproduction of articles via photocopy equipment) up to 100 copies of items from *The Nurse Practitioner* for educational, non-commercial purposes is granted at no cost by Lippincott Williams & Wilkins, except for articles bearing a copyright notice of others. Requests for other purposes or for over 100 copies are authorized provided that the appropriate fees are paid to the Copyright Clearance Center (CCC), 222 Rosewood Dr., Danvers, MA 01923, telephone 978-750-8400 (ref. *The Nurse Practitioner*, ISSN 0361-1817, specifying volume, number, date and title of article).

Microfilm

The journal is available on microfilm from University Microfilms, 300 North Zeeb Road, Ann Arbor, MI 48106; phone 313-761-4700.

Notice

The Nurse Practitioner is the official journal of The New York State Coalition of Nurse Practitioners. However, the publisher of *The Nurse Practitioner* is solely and completely responsible for the editorial and advertising content of the journal. The New York State Coalition of Nurse Practitioners does not edit or review the journal prior to publication and accepts no responsibility for errors, omissions, or the contents of the journal.

Periodically, newsletters and information from various NP organizations will be bound into *The Nurse Practitioner*. We hope readers will find these pieces of interest. The views expressed in the pieces are those of the organization; *The Nurse Practitioner* does not necessarily support the opinions expressed or warrant the accuracy of the information presented.

NP and *The Nurse Practitioner* are registered with the U.S. Patent and Trademark Office.
