22 **Autism: Understanding Conceptual Processing Deficits**

Nurses can help people with autism adjust to and function in mainstream society by understanding how they think and how they are affected by the triad of impairment that accompanies the disorder.

Andrew J. Cashin, Dip. App. Sci., BHSc, MN, PhD

32 **Cryotherapy for Treatment of ECT-Induced Headache**

Discover how a simple band containing frozen gel can help relieve the headaches that are a common side effect of electroconvulsive therapy.

Brian J. Drew, MSN, APRN, BC, Major L. King, PhD, CNS, and Linda Callahan, PhD, CRNA, RN

40 **Mid-Life Widows' Narratives of Support and Non-Support**

Learn about the experiences of mid-life widows—both the help and support they found, and the words and actions that left them feeling hurt or disappointed during their time of grieving. Six themes are highlighted with the widows' own narratives.

Elizabeth Scannell-Desch, PhD, RN, OCNS
