Features

26 Moving Psychiatric Patients to a New Hospital
Moving to a new state-of-the-art facility can be exciting, but some patients may be intimidated by such a big change. Read how one hospital prepared 129 patients for relocation.
Michael J. Schefani, RN, MS, MEd; Maryellen Phillips, MS, MBA, RN, BC, CNA, BC; and Barbara Caldwell, PhD, APRN-BC

32 Using Exercise to Treat Patients with Severe Mental Illness: How and Why?
An analysis of a forensic hospital's mandatory exercise program found 4 themes among patients and staff. Learn how emphasizing therapeutic relationships strengthened more than just muscle.
Trine Teitle, BA; Maria Charlotte Heimsnes, Cand. Polit.; and Roger Almvik, DPhil

41 Partial Hospitalization: Compatible with Evidence-Based and Recovery-Oriented Treatment?
Can a 9-to-5-day treatment program successfully help mental health consumers move toward vocational or recovery-oriented goals? Data from one program show that such service modalities do have potential.
Philip T. Yanos, PhD; Betty Vreeland, MSN, APRN, NP-C, BC; Shula Minsky, EdD; Rice B. Fuller, PhD; and David Roe, PhD

What Should Patients Be Told About Their Medications?
Prescription drugs already come with a wealth of written information, but clinicians should be ready to talk to patients about their medications and answer important questions.
Robert H. Howland, MD
