Research articles

- Soil CO₂ emissions measured by closed chamber and soil gradient methods in dry dipterocarp forest and sweet sorghum plots 1
Apaporn Bulsathaporn, Duangrat Suekhum, Phongthep Hanpattanakit, Montri Sanwangsi, Amnat Chidthaisong, Sirintornthep Towprayoon, Kazuyuki Inubushi, Pitayakon Limtong
- Interfacial tension of turmeric nanoparticles 11
Sakchai Auychaipornlert, Pojawon Prayurnprohm Lawanprasert, Suchada Piriyaprasarth, Pongtip Sithisarn
- The long-time dynamics of 3D non-autonomous Navier-Stokes equations with variable viscosity 18
Yongqiang Chen, Xin-guang Yang, Mengmeng Si
- A class of nonmonotone trust region algorithm for solving unconstrained nonlinear optimization problems 27
Fulan Ye, Yang You, Zhen Chen, Baoguo Chen
- A prediction-correction primal-dual hybrid gradient method for convex programming with linear constraints 34
Pibin Bing, Jialei Sui, Min Sun
- Two numerical iteration methods for solving absolute value equations 40
Jun He, Yanmin Liu, Junkang Tian
- Robust stability analysis for linear systems subjected to time-varying uncertainties within the framework of nest algebra 46
Xiaoping Xu, Liu Liu
- A companion of Ostrowski's inequality for complex functions defined on the unit circle and applications 54
Gang Li, Yue Luan, Jiangyong Yu
