

สารบัญ

Abbreviation	1	7. Development of the leukocyte	46
1. Preparation of the blood smear	2	Granulocytic series	46
Slide method	4	Monocytic series	52
Coverslip method	6	Lymphocytic series	54
2. Staining	10	Plasmacytic series	58
May-Grünwald-Giemsa stain	10	8. Development of the thrombocyte	60
Wright's stain	13	9. Red cell morphology abnormalities	62
3. Examination of the blood smear	16	Variation in size	62
4. Blood cells in normal circulation	20	Variation in staining	64
Erythrocyte	20	Variation in Shape	66
Leukocytes	22	Inclusion	72
Neutrophil	22	10. Classification of anemia	80
Eosinophil	22	11. Iron deficiency anemia	82
Basophil	22	12. Sideroblastic anemia	86
Lymphocyte	26	13. Thalassemia	90
Monocyte	26	14. Abnormal hemoglobin	92
Thrombocyte	30	15. Aplastic anemia	94
5. Origin of blood cells	32	16. Megaloblastic anemia	98
6. Development of the erythrocyte	34	17. Hemolytic anemias	102
Normoblastic	34	18. Malaria	106
erythropoiesis		<i>P. falciparum</i>	108
Megaloblastic	40	<i>P. vivax</i>	110
erythropoiesis		<i>P. malariae</i>	112
		<i>P. ovale</i>	114

19. White cell morphology abnormalities	116	28. Platelet disorders	162
20. Atypical lymphocyte	130	Thrombocytopenia	162
21. Leukemias	134	DIC	164
Acute leukemias	135	TTP	166
FAB classification	138	ITP	168
Cytochemical	142	Thrombocytosis	170
Staining		29. Miscellaneous	172
Chronic leukemias	148	Findings	
22. Hairy cell leukemia	150	LE phenomenon	172
23. Leukemoid reaction	152	Fetal staining	174
24. Leukoerythroblastic picture	154	Platelet satellitism	176
25. Myelofibrosis	156	Artifacts	178
26. Infectious mononucleosis	158	30. Summary	186
27. Multiple myeloma	160	References	192
		Index	194
